MANAGER
Craig Myotte

Under Vermont's Renewable Energy Standard (RES), which took effect in 2017, electric utilities are required to purchase a certain portion of their electric power supply from renewable resources in general and small, in-state renewable facilities specifically. Morrisville Water & Light, along with 11 other municipal utilities, is a member of Vermont Public Power Supply Authority (VPPSA), and compliance with the RES is met in aggregate with all VPPSA members. Please visit <https://vppsa.com/energy/renewable-energy-standard/> to learn about our RES compliance.
